I am a passionate software engineer with a love for problem solving, clear annotation, and learning the latest technology. I have 3 years working experience with a diverse cross-functional team in property management where I learned operations and how to make decisions with many stakeholders in mind. With my unique background and expertise in JavaScript, React, and TypeScript, I am excited to collaborate with a diverse group of programmers in a fast-paced work environment.

SKILLS

Languages - JavaScript, TypeScript, Python, CSS, HTML | **Libraries and Frameworks** - React, Next.js, Axios, Express.js, Bootstrap

Database - PostgreSQL, Sequelize, MongoDB, Mongoose | **Other** - REST API, JSON, Node.js, Asana, Figma

SOFTWARE DEVELOPMENT PROJECTS

[Owizard](#) | Quiz app for learning

July 2021 - Current

Next.js, TypeScript, JavaScript, Fetch API

- Currently working on implementing feature to build custom quiz through REST API
- Efficiently learned Next.js framework to create a fully functional app
- Applied Typescript for clean readable code and reduced bugs
- Used Fetch API to retrieve JSON data and parse through effectively

[Clambr](#) | Job search tracker

July 2021

React, JavaScript, MongoDB, Express, REST API, Axios, JSON, Styled Components, Asana, Mongoose

- Developed a full stack MERN web app for job application tracking with team of four
- Commended by team members for clear communication and strong leadership
- Collaborated with UX design team through Asana to ensure project feasibility and planning
- Established full REST API with Express back-end communicating to document database and React front-end
- Troubleshoot bugs and reviewed all code with team to utilize diverse skillset of each member

[Makin Benjis](#) | Stock portfolio simulator

June 2021

Express.js, EJS, PostgreSQL, Sequelize, REST API, JavaScript, Axios, Bootstrap, Node.js, Miro

- Created app to simulate stock portfolio with multiple users and real-time stock prices
- Designed app architecture utilizing DbDesigner for schema and Miro for visualization
- Implemented RESTful routing for API calls with Axios and stored data efficiently in relational database
- Utilized Bootstrap CSS framework to create responsive layout for users

[Save the Planet](#) | Click-based defender game

May 2021

JavaScript, CSS, HTML

- Leveraged JavaScript event loop and object-orientated design to create dry and easily scalable code
- Learned HTML Canvas to build off previous knowledge and create a fully functional game
- Created application with event listeners and styled using CSS 3

PROFESSIONAL EXPERIENCE

Jones Lang LaSalle | Santa Clara, CA

2018 - 2021

Assistant General Manager

- Collaborated with cross functional team to create, reforecast, and reconcile multiple budgets totaling over \$4 million in annual operating expenses
- Created and implemented tracking system for efficient organization and tracking of contracts
- Analyzed new leases, contracts, and property management agreements for over 40 tenants to ensure accuracy and compliance
- Trained and mentored 5 new team members for department best practices and company initiatives
- Presented monthly operational updates to clients and generated reports for assets totaling over 500,000 square feet

EDUCATION

General Assembly | Remote

April 2021 - July 2021

Software Engineering Immersive

Full-stack software engineering immersive student in an intensive, 500+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.

Gonzaga University | Spokane, WA

2014 - 2018

Bachelor of Business Administration

- President's and Dean's list for outstanding academic achievement
